

# The Depth Coaching Workshop

An offering from John Schuster, PCC  
[www.JohnPSchuster.com](http://www.JohnPSchuster.com)

This ICF-approved learning event will expand a coach's range of choices and methods. It is a type of psychologically informed leadership and transition coaching. This is a blended learning process (classroom and on-line) at two levels of intensity (6.5 or 23 CCEs from ICF). Initial offering, New York City and Houston.

## Benefits

- Coaches without background in psychological thinking will deepen and broaden their skill base for enhanced client outcomes in both leadership and life transition settings
- Therapists and counselors who are coaching or considering coaching will gain knowledge and skills to complement their practice with specific coaching disciplines for positive client outcomes

## Discussion

Neurobiology, mindfulness work, Jungian psychology, and more are converging into an emerging body of knowledge and practices that inform and guide the Depth Coaching Curriculum. Our approach honors the excellent work in the coaching field as captured in many books, coaching schools and the certifying bodies like ICF and GSAEC. Core concepts and considerations will include the power of the imagination, the second half of life, overcoming habituated neural networks, and the purpose-driven self.
